

Tulane School of Architecture's Preservation Studies Program,
in concert with the **Preservation Trades Network**, is pleased to present:

Preservation Studies Summer Field School
Monday July 13th - Friday July 31st

**"Cities of the Dead: Above-Ground Cemetery Preservation,
Conservation, Documentation Methodology and History"**

Applied Conservation Field Work, PRST-647
(2 Credits)

Field Studies in Historic Preservation, PRST-646
(3 Credits)

Total cost for 5 credit hour Field School \$4,125

In **Applied Conservation Field Work PRST-647**, students will learn via field work historically appropriate treatments for 19th century above-ground tombs. The Taylor Tomb in the Secret Garden of Lafayette Cemetery No. 1 will serve as one case study. Students will work under the tutelage of master craftsmen to learn about lime-based building technology in plaster, mortar, limewash and masonry applications.

Field Studies in Historic Preservation PRST-646 will be a seminar taught by professors in the TSA Preservation Studies Program. Topics include architectural history, preservation technology, landscape architecture, funerary iconography and history of New Orleans Cemeteries. Students will learn how to navigate through local archives to collect research for individual papers and group projects.

Digs: Double occupancy rooms with access to a communal kitchen and lounge will cost **\$418** per student for housing July 13th - July 31st. (Saturday check out on August 1st). A limited number of small scholarships and travel stipends may become available through grant funding.
